5. Material Safety Data Sheets for any hazardous materials must be submitted, if applicable

Definitions

Trailer: A vehicle, not propelled by its own power, which is capable of being drawn on the public highways by a motor vehicle, including but not limited to non-self-propelled vehicles used as living or sleeping quarters, as offices or for commercial storage or construction purposes, but excluding vehicles used to carry boats.

Container: An enclosed structure with no foundation used for storage.

Any property owner or tenant using property for the storage, parking or maintenance of a trailer or container is required to obtain a permit before using the trailer or container. All permits shall expire annually and must be renewed. A permit is required for trailers that are not registered and do not have Federal Highway Authority (FHWA) stamps. As a condition of the permit, the premises shall be free of rubbish, debris and suitably landscaped and maintained

If the contents of each trailer or container are different, the materials stored must be itemized on the attached application by the assigned trailer/container number.

If any hazardous or flammable materials are to be stored, Material Safety Data Sheets (MSDS) must be submitted with application.

Upon receipt of the application, a site inspection will be performed; it may be determined that a site plan and/or an application to the Zoning Board of Appeals is required.
